KZV Armenian School Learns to Code!

Dear families,

We have a very exciting announcement: This year, KZV has partnered with codeCampus to provide weekly coding lessons to students from 2nd to 8th grade!

Learning to code allows kids to use their math and logic skills to create incredible projects like computer games and animations. It can also help them to develop an interest in STEM fields like engineering, robotics, and IT.

These classes will be offered as part of the curriculum for **5th through 8th** grade students, and will be taught during the school day every Monday.

For grades **2nd to 4th**, the coding class will be offered as an after school activity, for a fee. For those students, if you are interested, please sign up your child using this [link.](link) Deadline to sign up is August 19, as class will start Monday, August 22nd.

We can't wait to see what they make!

when: at school

for: 2nd to 8th grades

learn to code!
